

MoveON

Intelligent software for managing partners & mobility

Enabling global potential for international education

As we continue to see rapid growth in international student and staff mobility, a growing number of institutions seek alternative, less traditional management solutions. Pressure builds to update processes, improve workflows, promote partner relations and maximise on available resources.

At QS, we work closely with more than 340 international offices within global higher education, to successfully manage staff and student mobility, as well as partner relations. Our industry knowledge and experience enables us to understand the growing challenges faced by institutions worldwide.

With over 340 clients in 24 countries worldwide, MoveON is the industry-leading solution for the management of your institution's international priorities.

Empower student mobility with MoveON

Empower student mobility with MoveON

Through the latest technology and community-building, QS supports, encourages, connects and inspires educational institutions, enabling them to focus on what matters most – the student.

Students now seek international experiences throughout their educational journey.

The number of global international students is expected to grow by

60%

between 2019 and 2030.

Increase mobility numbers

Higher education is in a state of transformation, with knowledge becoming the driving force of today's society, making international education more desirable than ever before.

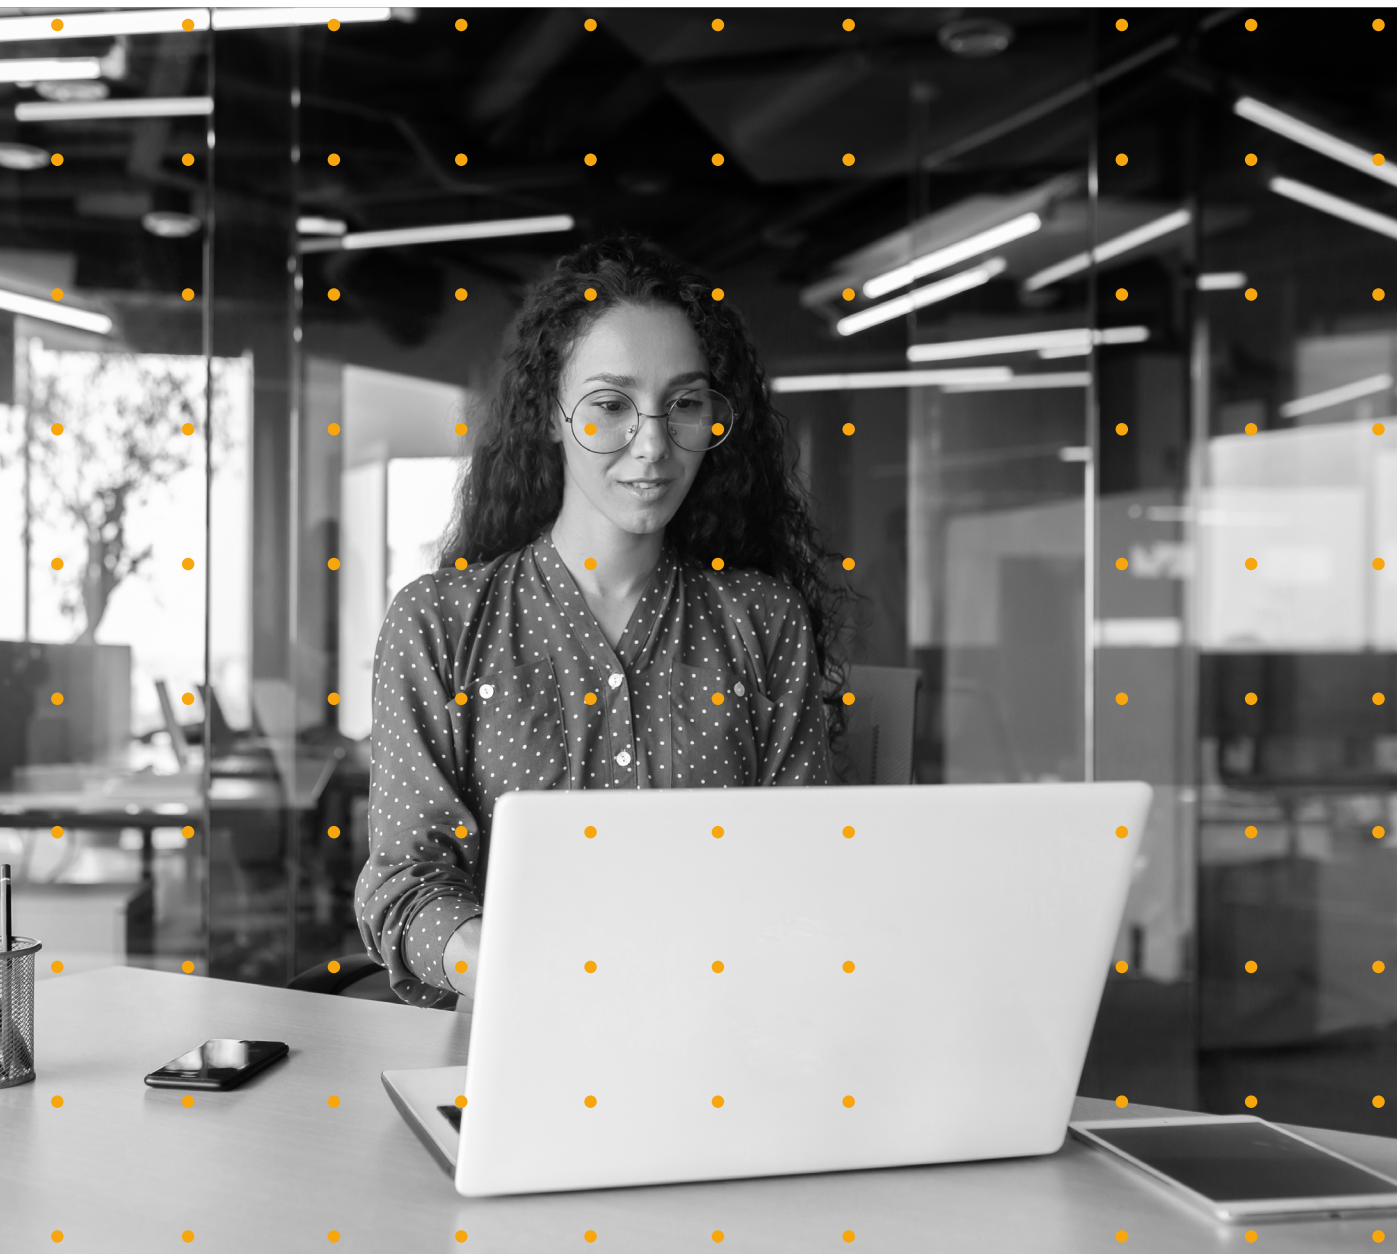

Forge international partnerships

Governments, corporations, national and international programmes and agencies show an increased interest in helping institutions connect with more international partners, for a truly globalised higher education.

Compete on a global scale

Increasing your institution's global reach will have a positive impact on your brand awareness, income, academic and research achievement.

What is MoveON

MoveON is a SaaS solution designed to manage all international activities in one single system.

Hosted by secured and certified data centres, MoveON is a cloud-enabled platform that offers access to a wide array of powerful and intuitive features.

Online forms

Create attractive online forms within your university's brand.

Automated applications

Allow applicants to attach documents, fill mandatory fields, and complete their application at their own pace.

Customisable dashboards

Manage daily workload, with quick access to recent activities and important tasks.

Global brand

Access interactive world map to simplify navigation

Student nominations

Nominate students to and from partner institutions with standardised and automated data transfer procedures.

Seat assignment tool

Review and select student seat allocation in real-time.

CRM functionality

Nurture relations with international partners by collating in one place all documentation, agreements and communication with key contacts and 3rd parties.

In-depth reporting

Collect partner activity data and analyse by geography, view agreement approval and renewal status and easily share information with stakeholders.

Communication tools

Log emails and telephone conversations in CRM environment and benefit from customisable message templates.

Finance management

Manage online payments, grant calculations (including Erasmus Reports), automate financial operations with multiple currencies and create quick and reliable financial reports.

What can MoveON do for you?

Enhance the mobility experience

Boost awareness by showcasing international mobility opportunities across your institution through the publisher tool.

Create enhanced profiles by encouraging students and staff to complete online travel logs based on their international experiences and use the reports to promote mobility more efficiently.

Make applying easier with online forms that let staff track application status, identify potential dropouts and speed up the application process by reducing paperwork.

Track travelling students and staff using the built-in CRM functionality to stay in touch through the application process, the preparation stage and in the event of an emergency.

Transform the way you work

Move online and eliminate insecure paper-based methods to effectively manage all mobility and partner data from within one central platform.

Create resource efficiency by automating tasks, streamlining workflows and reducing costs related to postage and printing.

Enhance the applicant experience by bringing opportunities within their immediate reach and offering support throughout the application process to reduce drop-out rates.

Use reporting and analytics to monitor your internationalisation indicators, easily produce reports to quantify activity and use findings to measure against targets.

Nurture international partners

Collaborate across your institution and allow multiple departments and faculties to store all information accurately, in one single platform.

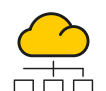

Report and track against KPIs by measuring, monitoring and analysing accurate, up-to-date data exported from your international partners' records.

Showcase international partnerships through an online publisher tool that integrates with your website and staff intranet for an all access view to your institution's internationalisation.

Manage partner relations in one online environment and use the CRM functionality to build a record of communication, documentation and agreements.

Everything you need in one platform

All you need from an enterprise platform provider and more

Infrastructure

Securely access this SaaS solution anywhere at any time.

Data access

Nurture internal and external relations by collating documentation, agreements and communication within a centralised hub.

Integration

Use the open API to connect with existing systems like Banner, HIS and Apogee, as well as payment tools such as PayPal and SAP.

Global services

Receive training and ongoing support from dedicated project managers, account managers and support staff.

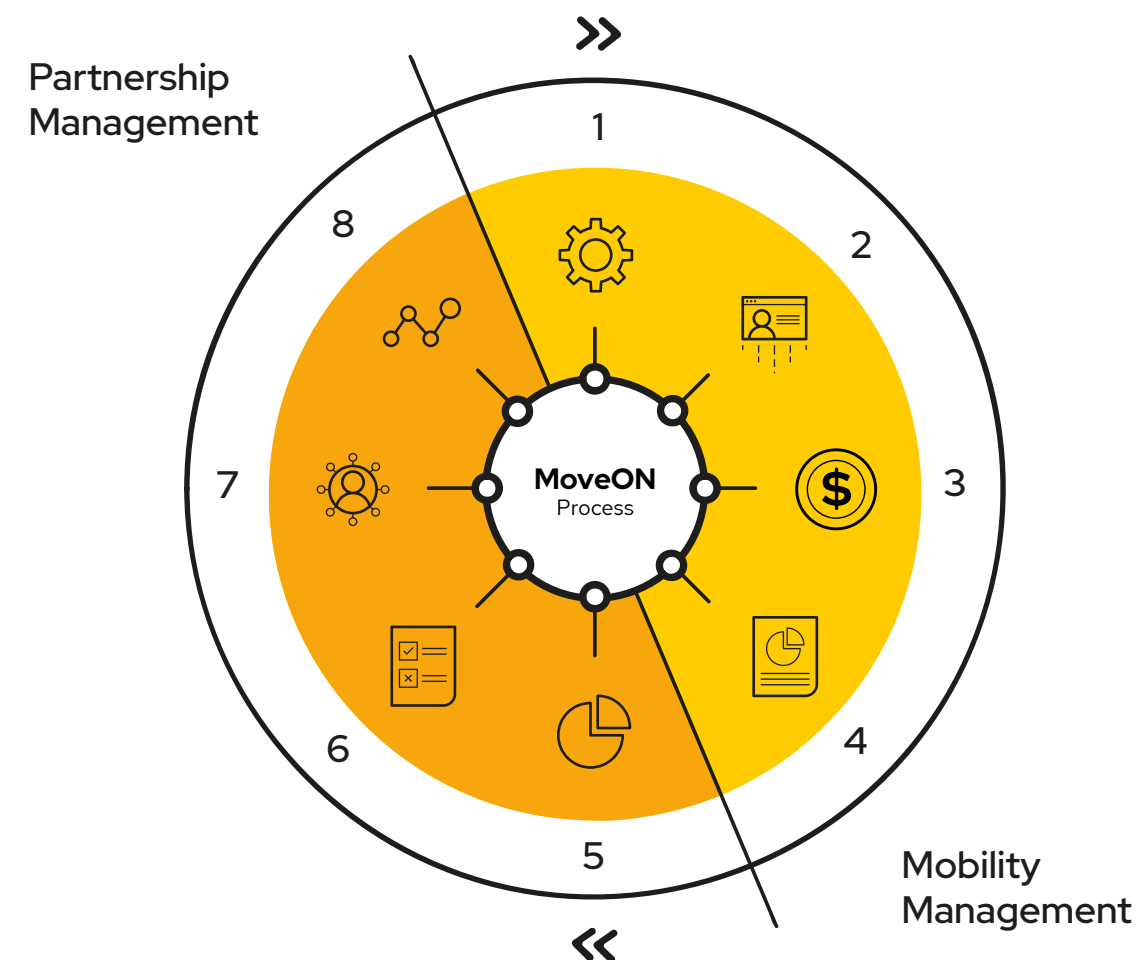

Workflows

Reduce inefficiencies by moving to an online platform.

Active user community

Attend our annual user conference, regular user groups and training sessions.

Step 1

Use the online publisher tool to generate the motivation to take part in an international mobility experience.

Step 2

Manage the international student lifecycle. Take inquiries, build online forms, and track and assign places via an online portal that's also accessible to the student.

Step 3

Support active mobilities by managing finance, funding, accommodation, courses and providing students with a platform to build travel reports.

Step 4

Produce at-a-glance reports, compile information for multiple stakeholders and measure against KPIs.

Step 5

Collate data on partner relationships from across your institution. Then market your network internally and externally using the interactive publisher.

Step 6

Use the online forms to create and record partner agreements.

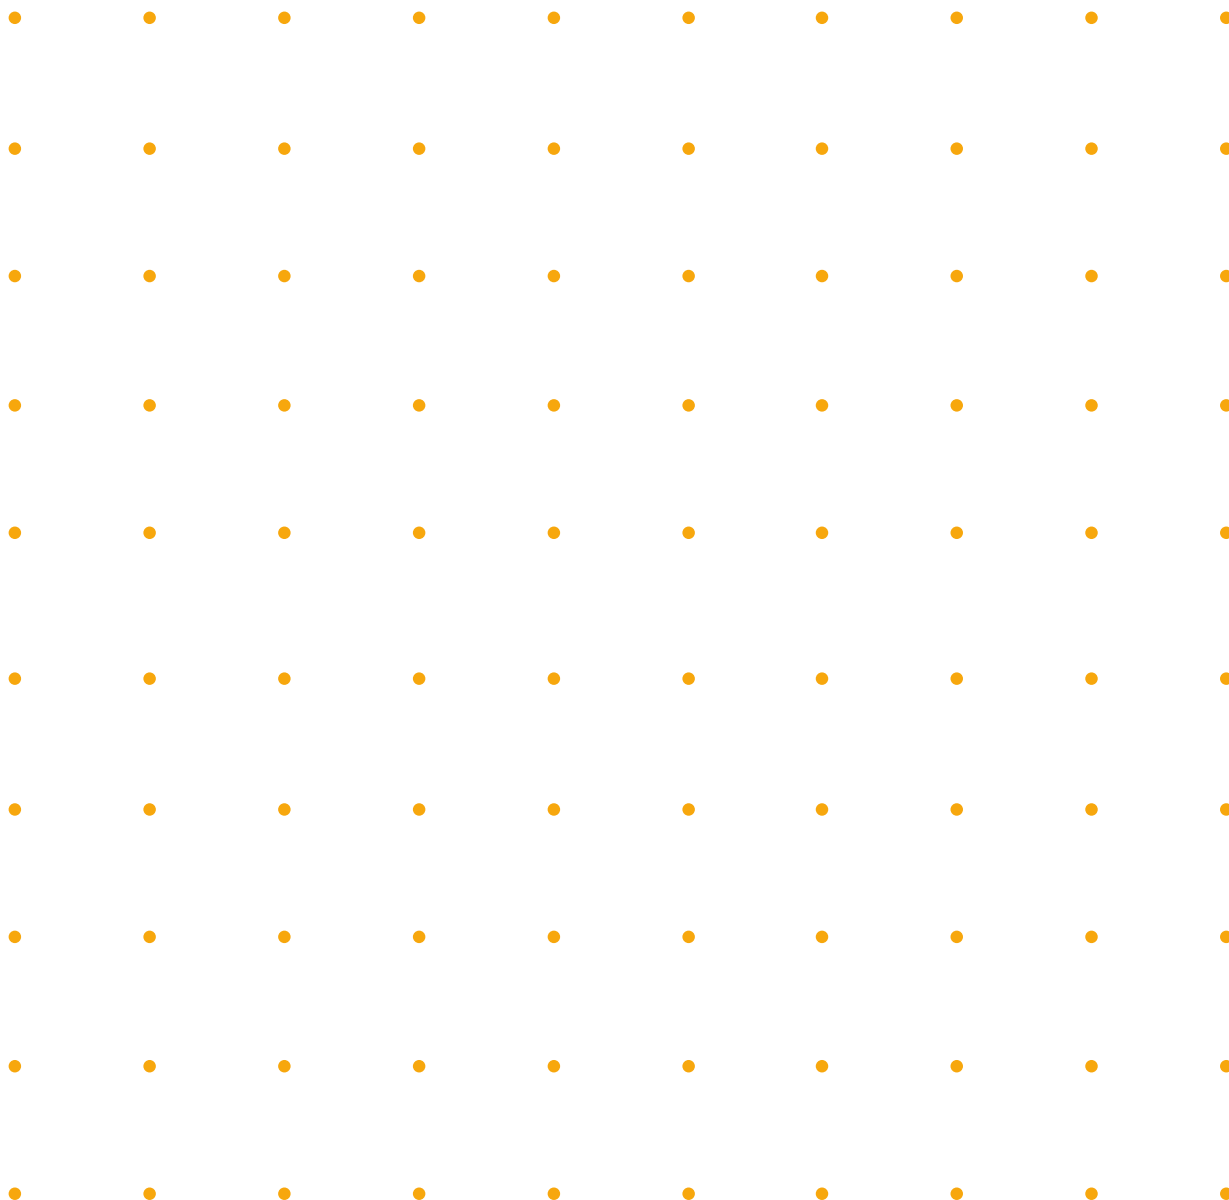

Step 7

Communicate and manage activity within the CRM environment.

Step 8

Track and measure partnership relationships against your KPIs and report to relevant leadership and agencies.
